Characteristics:

Production Area

- > The area where Glera grapes are grown ranges from Conegliano hills to the foot of Valdobbiadene hills.
- > The area is characterized by a mild climate and alluvial clay soils, ideal for enhancing the features of Glera grapes.

Production Process

- > Around mid-September, when analyses show correct acidity and good minerality, grapes are picked and moved to the winery in order to prevent mechanical damages and premature oxidation.
- > Grapes are gently pressed removing the stems, the must is separated from the skins and then cleaned.
- > The first fermentation occurs in steel tanks with the addition of selected yeasts. In accordance to the Martinotti method, the second fermentation occurs in cuve close at a controlled temperature of 14°C, to preserve the primary aromas of the grapes.
- > At the end of the process, the wine is cold stabilized, filtered and bottled.
