Production Area

> Bottega Brut Millesimato is obtained by a blend of different vines (Glera, Chardonnay and Pinot) grown in territories where the mild climate, favorable exposure, draining calcareous clay soils result in a good acidity and excellent notes.

Production Process

- > Around mid-September, grapes are harvested and moved to the winery in order to prevent mechanical damages, premature oxidation, microbial contamination and exposure to the sun, which may cause alteration and impair quality.
- > Grapes are gently pressed removing the stems, the must is separated from the skins and then cleaned.
- > The first fermentation occurs in steel tanks with the addition of selected yeasts.
- > In accordance to the Martinotti method, the second fermentation occurs in cuve close at a controlled temperature of 14 °C, to preserve the primary aromas of the grapes. When sugars are transformed into alcohol, yeasts release carbon dioxide, making the wine "sparkling".
- > At the end of the process, the wine is cold stabilized, filtered and bottled.
