Berry Vodka - cl 70

This distillate, whose origins seem to trace back to Poland, owes its name to the word "voda" (meaning 'water'), due to its transparent color. Initially used as a medicine, when distillation techniques allowed to obtain a more refined product it started to be used first to fortify wines, then to be served pure. Berry Vodka Alexander is a distillate from grain only, with a crystalline transparency and a fine, elegant taste, enriched by raspberry flavor, and enclosed in a unique, refined packaging.

Production Area: Veneto, Italy

Characteristics:

The choice of raw materials used in vodka production may lead to end products with very different quality. For this reason, Vodka Alexander is produced by fermenting an infusion of sugars obtained from pure grain only, a noble raw material that leads to a distillate with a strong character. Distillation techniques may also result in very diverse quality. Berry Vodka Alexander is obtained through five distillation phases, allowing to extract the aromatic characteristics from the raw material and leading to a rich and complex distillate. The pure water from the Alps and raspberry flavor enrich it with typical, unmistakable perfume and taste. It is finally filtered to eliminate impurities which may alter its organoleptic profile.

Organoleptic Characteristics:

Color and Appearance: Colorless, transparent, crystal clear.

Bouquet: Intense, fresh, with characteristic hints of raspberry.

Taste: Soft, captivating, with a pleasant aroma of raspberry which reminds of its olfactory sensations.

Chemical Characteristics:

ABV: 38%

Serving Temperature: - 5 °C

Serving Suggestions: It is best served chilled, even with ice. Thanks to its elegance, it can be enjoyed pure and is a perfect base in cocktails and long drinks.

Enjoy it within: 5 years.

Recommended Glass: Tumbler.
